

Specialized Lubricants

THE BOTTOM LINE

Schaeffer grease extends component life at feed mill.

THE CUSTOMER

Producer's Cooperative, Bryan Texas

THE STORY

Chris Maresh is the Feed Mill Production Manager for Producer's Cooperative in Bryan, Texas. He has been using Schaeffer lubricants in the plant since 2003. Recently, an equipment representative mentioned to Chris that the bearings in his processing equipment normally only last two years. Thinking back, Chris realized the bearings in that unit had been in operation for seven years. He immediately attributed the long bearing life to the Schaeffer grease. When he gets an invoice for \$400 for a keg of grease, he thinks of how much money he is saving from not replacing all the components that used to wear out. It's not the cost to buy; it's the cost to use.

Producer's Cooperative uses Schaeffer's grease, gear oil, and compressor fluid.
